

Santa Fe Trail Ranch

Climatological Data
for

2001

The climatological data in this document represents a compilation of the Weather Stats pages from the original Santa Fe Trail Ranch web site and continuing data collection since moving to the new SFTR web site.

Until April 2012, longtime resident Walt Wolff collected and posted daily weather data. But the wintery weather and work associated with maintaining the beautiful Loma Lobo property caused Joyce and Walt to switch to part-time status. Walt gave Robert L. Scott the weather equipment and Bob posted the weather updates until his equipment failed in January 2018. Since then, the data has come from the StargateCOlorado weather station (same type of equipment that Walt/Bob used) maintained by Ernie Parker / Sharon Sorenson.

The data is broken into two sections: the charts in the first section are a synopsis of the weather on the Ranch. For more detailed data (and an aid to help you sleep!), see the monthly climatological tables in the second section.

Notes:

- The StargateCOlorado weather station is at the south end of the Ranch and at a higher elevation than the station maintained by Walt Wolff & Bob Scott. As a result, you will find that, on average, the temperature readings will be slightly lower, and the precipitation readings will be slightly higher than those reported by Bob/Walt's stations.
- The data shown on the various pages starts at a high level and gets more detailed the further down you go.
 - The highest-level charts show the precipitation, snow, temperature, and winds for the entire year.
 - The middle-level charts show the temperature and winds for each month of the year.
 - The lowest-level tables provide all the data collected by the weather station.
 - The snow data has only been collected since 2015 by Ernie / Sharon and does not come from the weather station.
 - What's the definition of "Mean Temperature"? Unlike most weather information, where the "Average Temperature" is just the average of the highest and lowest temperatures of the day, the weather station captures the temperature every 15 minutes, collecting 96 readings per day. The "Mean Temperature" is the average of all 96 readings, giving you a more accurate value.
- Prior to 2022, the times shown in the climatological tables are based on a 12-hour (AM/PM) clock. Starting in 2022, the times listed are based on a 24-hour clock. The data collection program suddenly switched modes.

Enjoy!!

--Ernie Parker

- About 6-8 inches of snow fell on 15/16 and on 26/27. " Skiffs" fell on a few other days.
- Vaughn and Joann Roundy, Lot H-14, on the extreme South end reported about 10 inches from the last snow.

- About 4"-6" snow on the 8th (which did leave a muddy mess for many areas of the Ranch). A few skiffs fell later in the month and we had a very frosty 27th. On the north end we normally do not receive as much snow as to the south because of the higher elevation there - near 8,000'.

- 3rd: About 2" of snow fell in the evening.
- 7th: In the evening we received 3-4" inches of very wet snow, mixed with rain. Most roads were slick all day on the 8th.
- 10th: Beginning early afternoon it rained, hailed, sleeted, and then began to snow heavily till about 10:00pm; we had 4" here.
- 14th: We had a bare inch of snowfall from about 8 - 10pm.
- 16th: Light skiff of snow during the evening.
- 17th: About 1-2". Light snow throughout the day.
- 18th: About an inch of snow during the late evening.

- 17th: About 3:00pm I drove through a sudden hailstorm just past exit 11. Luckily, it was a localized storm and did not reach Loma Lobo. Welcome moisture did, however.

- 28th: Las Animas County was under a tornado watch until about 9:30 pm. The north end of the Ranch had only a little rain, hail, and wind. At the south end, extensive hail damage was reported. A tornado touched down 15 miles east of Colorado Springs. In some places there were reports of 12 inches of hail.

- 16th: My-O-My...Hot-N-Dry!! and more of the same predicted.
- 21st: Early this morning we had about a half inch of welcome rain, with lots of lightning. Also, there were strikes on the Ranch yesterday afternoon, starting 2 fires.
 - The first fire was off Cottonwood, near a jeep trail, small fire and contained quickly.

- The 2nd, larger, fire was off Spruce Lane and down a steep ridge. It was more difficult since water had to be packed in. It was contained by late evening. The hike out was not all that easy,

Thanks to all our Ranch fire fighters and those from Trinidad Lakes who work so hard for all of us!

- 4th-5th: Two earthquakes thst shook several Ranch homes. The magnitudes reported to be 3.4 to 4.5. Coordinates place the epicenter at the far west end of Trinidad Reservoir. These quakes were reported to be at a relatively shallow depth, 5km.
- 6th: Two more quakes in the early hours in the same general area; magnitudes of 3.5 and 3.6.
- 10th: Quake, same location, magnitude: 3.4.
- 11th: A TERRIBLE DAY IN THE HISTORY OF THE UNITED STATES, AND ONE MORE THAT WILL BE REMEMBERED AS "A DAY THAT WILL LIVE IN INFAMY!"
- 13th & 21st: More small quakes.
- 26th: Record high temps. were set in Colorado Springs and Pueblo.

- 19th: A skiff of snow on the ground this morning - very pretty.
- 23rd: Woke up to fluffy white flakes falling. Not a lot of snow expected but every little bit of moisture is welcome. By the end of the day about 4"-5" of the white stuff.
